DC-6 COLOR DOPPLER SYSTEM

MINDRAY is proud to introduce DC-6, a color Doppler ultrasound system for general applications. DC-6 incorporates the latest digital ultrasound image processing technology and provides advanced clinical solutions. DC-6 creates an interactive process connecting sonographers, patients, transducers and instrument. The ergonomic design and powerful hardware greatly increase diagnosis accuracy and efficiency.

• From \$ 38,995.00

DP-9900PLUS DIGITAL ULTRASONIC SYSTEM

Benefiting from revolutionary all digital ultrasound imaging technology and the latest advancement in electronic engineering, DP-9900Plus features outstanding imaging quality and rich functionalities, which fully meet various clinical requirements. A source of confidence in your diagnosis, DP-9900Plus is thus rated as a classic model of black and white ultrasound systems. With outstanding imaging quality and complete information solution, DP-9900Plus brings customers the most human and ergonomic value experience.

• From \$ 23,995.00

DP-6600 DIGITAL & PORTABLE ULTRASOUND

With innovative technologies and optimized design, the portable ultrasound DP-6600 brings high quality digital diagnostic images to wherever you want. Excellent imaging performance and reliable diagnosis make clinical examinations easier. DP-6600 motivated by the XD-Engine, optimizes imaging precision via full digital technologies and ensures the reality and perfection of images.

• From \$15,995.00

DP-3300 VETERINARY ULTRASOUND SYSTEM

With advance digital beam-forming (DBF) technologies, DP-3300Vet has realized significant improvement on image quality. Meanwhile, broadband and multi-frequency transducer enable a wide range of clinical applications. Also, 128 CINE Loop, 90 images storage and the second optional transducer connector provide operators with more options and flexibility. With such power features and ergonomic design, DP-3300Vet is the ideal model for users who seek for a economical product.

• From \$ 10,995.00
